## ABOUT BAMBOO BASICS

*We let you experience the ultimate comfort of bamboo!*

Bamboo Basics is the new standard in underwear. We let you experience the comfort of bamboo! Underwear from Bamboo Basics feels silky soft and stays fresh for a long time. Bamboo has many benefits, but we understand that comfort is the most important thing for customers!

Accelerating the transition to a fair and non-polluting fashion industry—that's the vision of Bamboo Basics. Every decision we make is guided by this commitment. We know that there is still a very long way to go, but we are making persistent and motivated steps in the right direction.

Bamboo Basics underwear feels super soft and stays fresh for a very long time. Bamboo has many benefits, such as thermo comfort, uv protection, it's breathable and hypoallergenic. Bamboo fabric also absorbs up to 7x more moisture than cotton. This prevents unpleasant odors and ensures a fresh feeling throughout the day.

### OEKO-TEX 100

Bamboo Basics is OEKO-TEX 100 certified. This means that our products do not contain any harmful substances for people and the environment.

### ORGANIC COTTON

To make our products stronger and offer a longer lifespan, some of our products consist of 28% organic cotton.

Organic cotton is cultivated without the use of synthetic pesticides and herbicides. Organic cotton farming uses less water compared to conventional cotton farming, as it relies on rain-fed systems more often. Also, it avoids harmful chemicals, preventing water and soil contamination and protecting local ecosystems.

### TANBOOCEL

To make yarn from bamboo, 2 types of chemicals are needed in the process. We use Tanboocel, which ensures that the chemicals do not end up in the environment. Tanboocel uses a closed loop system in which 100% of the chemicals used are collected and recycled.

## THE BENEFITS OF BAMBOO UNDERWEAR

### Super soft

The fabric is smooth and feels incredibly soft, thanks to the round surface of the bamboo fibers. High comfort guaranteed!

### Thermo comfort

Bamboo insulates, keeping you cool in the summer and warmer than cotton in the winter. This function is ensured by the open structure of the bamboo fibers.

### Breathable

The micro-holes in bamboo fibers ensure that moisture (sweat) is absorbed and evaporates faster. Bamboo is 70% more absorbent than cotton.

### UV protection

Bamboo is naturally UV-protective, blocking 98% of harmful UV rays.

### Crease resistant

As soon as you take our T-shirts out of the washing machine, they are almost wrinkle-free. Ironing is therefore unnecessary!

### Hypoallergenic

Bamboo underwear is perfect for sensitive skin or allergies because bamboo is hypoallergenic.

### Quality

Despite its softness, bamboo fibers are strong, ensuring durable clothing. The fabric resists creasing, is antistatic, retains its shape, and can be easily washed in the machine.

### Perfect fit

The combination of elastane, cotton, and bamboo creates a strong fabric with a perfect fit.

Bamboo Basics you have to feel it!

## CIRCULAR MADE

## THE BENEFITS OF BAMBOO BASICS X CIRCULAR MADE

### Circularity

Take the first steps towards circularity together with Bamboo Basics

### Textile waste mountain

Contribute to reducing the textile waste mountain.

### Extremely soft & comfortable

The Circular Made items are even softer and more comfortable.

### Textile waste to premium underwear

Transform textile waste into premium underwear

## CIRCULAR MADE FIBER

Premium underwear brand Bamboo Basics presents its Circular Made collection: T-shirts and underwear made from post-consumer textile waste and bamboo, the first of its kind.

With this, the brand contributes to reducing the textile waste mountain and promotes the upcycling of discarded clothing. These are the first steps towards circularity, with the ultimate goal of developing products that are infinitely recyclable and completely circular.

Bamboo Basics believes that textiles deserve a better second life than ending up as waste. However, recycling textiles is easier said than done. In fact, recycling post-consumer textiles is one of the world's biggest sustainability challenges in the fashion industry.

The Swedish forest industry group Södra has found a unique solution to recycle waste from blended fibres on a large scale. Bamboo Basics is one of the first companies to work with this new fibre and now presents the first T-shirts and underwear made from clothing waste, mixed with the fine properties of bamboo.

## TEXTILE WASTE

Södra is the first company to recycle blended fibres with a high synthetic content and is also one of the few to produce pulp that can be turned back into viscose fibres and new textiles.

The pulp produced in the process consists of cellulose derived from two sources: recycled textiles and wood from Södra's responsibly managed forests. The pulp matches dissolving pulp for viscose or lyocell production in terms of purity, quality, and properties.

The fibre used in Bamboo Basics' products is made from this pulp. These Circular Made fibres combine with bamboo fibre from responsibly managed plantations, creating a comfortable end product.

Bamboo Basics is continuously researching and innovating to reduce CO2 emissions and water consumption, thereby minimizing its footprint. The brand also strives for greater circularity in the fashion industry, contributing to their vision:

*"Accelerating the transition to a fair and non-polluting fashion industry."*

Boxershorts - 3-pack  
Black/Burgundy  
Article number: RICK-001

66% Viscose (Bamboo)
