SASSA wird noch nachhaltiger

Das Thema Nachhaltigkeit hat bei Sassa große Bedeutung. In Zeiten des Klimawandels steht für uns neben Mode zu fairen Preisen eine nachhaltige und umweltfreundliche Produktion an erster Stelle.

SASSA becomes even more sustainable

The topic of sustainability is very important for Sassa. In times of climate change, sustainable and environmentally friendly production is our top priority in addition to fashion at fair prices.

SASSA uses outer packaging sleeves which consist exclusively of recyclable polyester.

Sustainable polyester fabrics are being used in the »Shiny Sustainable« and »Sustainable Micro« series as well as in our sports bras. These fabrics comply to the »Global Recycled Standard«. Their raw materials range from recycled PET-bottles to old fishing nets.

All cardboard boxes used in our in-house warehouse logistics are made from recycled waste paper. This also applies to packaging in online shops.

Our catalogues are printed on natural paper.

Our products are manufactured using carefully selected fabrics, lace and accessories. Our collections comply almost exclusively with the OEKO-TEX® Standard 100 and the requirements of the REACH regulation.

We also use sustainable and rapidly renewable raw materials such as bamboo, TENCEL™ Lyocell fibers und TENCEL™ Modal fibers.

For additional work on our merchandise like individual packing for our customers etc. we employ the services of the Bruderhaus-Diakonie, a workshop operated by the non-profit Gustav Werner Foundation. This workshop offers people with disabilities the opportunity to actively participate in work life.

As a member of the amfori BSCI (Business Social Compliance Initiative) SASSA and our producers commit themselves to good working conditions and responsible behavior based on the underlying code of conduct.

For more than 25 years we have maintained long-term, fair and loyal relationships with our producers.
